
Blue Atlas Cedar

Cedrus atlantica 'Glauca'

Sun 25-40' Tall 15-25' Across

A dramatic pyramidal tree with clusters of short frosty silver-blue needles. Uniformly stiff ascending main branches spread to give the tree a full open look. Protect from summer winds.

Spartan Juniper

Juniperus chinensis 'Spartan'

Sun 15-20' tall 8' across

Rich green color with a dense pyramidal habit. Naturally maintains a nice shape. Medium Growth Rate. Good for groupings, screens, or barriers.

Canart Juniper

Juniperus virginiana 'Canaertii'

Sun 15-20' tall 12' across

Compact pyramidal growth when young, opening with age. Develops very picturesque appearance. Produces numerous pale blue berry-like cones. One of the best junipers for Kansas. Medium Growth Rate.

Taylor Juniper

Juniperus virginiana 'Taylor'

Sun 20-25' tall 2-3' across

Distinctive, upright narrow form with medium green foliage and a hint of gray. Winter foliage is a medium brown. Tolerant of poor, dry sites and high pH soils. Medium Growth Rate.

Norway Spruce

Picea abies

Sun 40-60' tall 25-30' across

A very adaptable evergreen tree in harsh conditions. Water in drought conditions when young. Thrives under seasonal drought once established. Does not like wet soils. Medium to fast growth rate.

Columnar Norway Spruce

Picea abies 'Cupressina'

Sun 20-30' Tall 4-6' Across

The narrow fastigiate form of Norway Spruce is in high demand for urban and boundary plantings where strong vertical accents are required. This selection grows quite quickly.

White Spruce

Picea glauca

Sun 30-50' Tall 10-20' Across

A tough, adaptable spruce with short blueish green needles. This slow growing tree would make an excellent screen, hedge or specimen. Slow growing.

Weeping White Spruce

Picea glauca 'Pendula'

Sun 30-40' Tall 6-8' Across

A strong central leader and blue-green foliage on highly pendulous limbs are distinctive characteristics of this evergreen tree. Adds vertical interest to landscapes or can be used as a focal point.

Brun's Serbian Spruce

Picea omorika 'Brun's'

Sun 20-30' Tall 8-10' Across

Strongly upright branches of this spruce reveal white stomata on the undersides of the needles giving the tree a silver cast. Its upright form & graceful branches create a striking silver-blue habit.

Brun's Weeping Serbian Spruce

Picea omorika 'Pendula Brun's'

Sun 20-30' Tall 4-6' Across

Pyramidal form and silvery blue needles on horizontal branches. Outstanding color and slow growth. Good for locations with limited space.

Thompson Blue Spruce

Picea pungens 'Thompsons'

Sun 30-50' tall 20' across

A symmetrical, pyramidal tree with thick, whitish-silvery-blue needles. Prefers a rich, moist soil in full sunlight. Water during periods of drought when young. Slow Growth Rate.

Fastigiata Blue Spruce

Picea pungens glauca 'Fastigiata'

Sun 12-15' Tall 2-3' Across

An interesting tree with a tight columnar habit and attractive blue color. Since it will not grow as tall as the species, nor as wide, it is the perfect choice for planting in a smaller areas.

The Blues Blue Weeping Spruce

Picea pungens pendula 'The Blues'

Sun 5-6' Tall 3-4' Across

Slow growing conifer with weeping branches, spreading in many directions. Bright, silvery-blue foliage. A great accent or specimen. This weeping spruce holds upright leader.

Southwest White Pine

Pinus strobiformis

Sun 40' tall 25' across

Pine tree similar to Eastern White Pine, but more adaptable to different sites and soil conditions. Foliage has a slight blue cast. Medium to fast growth rate.

White Pine

Pinus strobus

Sun to Part Shade 50-80' tall 20-40' across

Soft textured, slender, light bluish-green foliage. Pyramidal when young becoming broader with age. Likes fertile, moist, well-drained soil. Fast growth rate.

Columnar White Pine

Pinus strobus 'Fastigiata'

Sun 40' tall 10-15' across

Soft textured, slender, light bluish-green foliage. Pyramidal when young becoming broader with age. Likes fertile, moist, well-drained soil. Fast growth rate. Half the width of White Pine.
