

**Empire Apple**

Apple

Sun 15-25' tall 15-20' across

Sweet and juicy, sprightly flavor, a cross of McIntosh and Red Delicious. Does well in hot summers. A heavy bearing tree. Ripens in late August to September.

---

**Freedom Apple**

Apple

Sun 15-25' tall 15-25' across

The red fruit is large and good for eating, sauces and juice. The flesh is crisp and juicy with a slight tart flavor. Immune to many apple diseases. Use any other apple for pollination.

---

**Liberty Apple**

Apple

Sun 15-25' tall 15-25' across

Medium to large sized fruit. Red, crisp and juicy with a sprightly flavor. Very productive. One of the most disease resistant apples developed to date. Use any other apple for pollination.

---

**Gala Apple**

Malus x 'Gala'

Sun 15-25' tall 15-25' across

A great early season apple with crisp firm fruit. Fine-grained texture and excellent flavor makes a sweet snack fresh or baked. Use any other apple for pollination.

---

**Elberta Peach**

Peach

Sun 10-12' tall 10-12' across

Very large, freestone fruit with deep golden yellow skin blushed over with red. A very high quality eating and canning peach. Resistant to brown rot. Self-Pollinating.

---

**Redhaven Peach**

Peach

Sun 15-20' tall 15-20' across

One of the finest early peaches and one of the hardiest. The fruit has a beautiful red and golden yellow color with a firm flesh, smooth texture, and fine flavor. Disease resistant. Self-pollinating.

---

**Montmorency Cherry**

Sour Cherry

Sun 12-18' tall 12-18' across

A very productive and hardy tree producing large, brilliant red fruit with yellow flesh. Excellent tart cherry for pies. Ripens after Northstar, usually mid to late July. Self-Pollinating.

---

**Northstar Cherry**

Sour Cherry

Sun 8-10' tall 8-10' across

Vigorous, hardy tree producing red fruit with red flesh and a sweet-sour taste. Excellent for eating and canning. Ripens in June and July. Resistant to brown rot and cracking. Self-pollinating.
