

---

**Asparagus**

Millennium

Sun Space 12-15" apart, rows 4-5' apart

Harvest next spring

Hybrid with heat tolerance and high productivity. Plant from mid-March to April. Thrives best in soils high in organic matter. These are one-year-old crowns.

---

**Asparagus**

Purple Passion

Sun Space 6-8" apart, rows 4-5' apart

Harvest next spring

Sweeter and more tender than green varieties. Beautiful purple spears turn green when cooked. A colorful addition to your salad.

---

**Blackberry**

Chester Thornless Blackberry

Sun Space 4-10' apart

A heavy yielding, semi-erect, thornless variety with medium to large fruit and honey-sweet flavor. Tolerates heat and grows to about 5'-6' tall. Great for pies, jams, or just fresh eating.

---

**Blueberry**

Kabluey Blueberry

Sun Space 5' apart

A large vigorous shrub that produces heavy crops of medium size blueberries. The foliage is glossy green in summer and turns fiery red in fall. Needs acidic soil.

---

**Blueberry**

Northblue Blueberry

Sun Space 5' apart

The fruit is dark blue, large, with excellent flavor. The plant has glossy green leaves and will do well as a landscape plant. Grows 20" tall. Needs acidic soil.

---

**Blueberry**

Patriot Blueberry

Sun Space 5' apart

Fruit is very large and firm with excellent flavor. This shrub is upright, open, and vigorous. Has white flowers in spring, dark foliage in summer, and fiery orange fall color. Needs acidic soil.

---

**Broccoli**

Destiny

Sun Space 18" apart, rows 36" apart

Harvest 55-65 days from transplant

Heads are above plant, easy to harvest. Second crop of side shoots produced after cutting main head. Grow early spring or fall after temps begin to drop.

---

**Bush Bean**

Blue Lake

Space 4" apart, rows 24" apart

Harvest 58 days from transplant

Produces long fully rounded pods. White seeds are slow to develop. Produces heavy crops over a long season.

---

**Cabbage**

Ruby Perfection

Space 18" apart, rows 36" apart

Harvest 76 days from transplant

Early to mid season cabbage producing tight round heads averaging 3 pounds and red in color.

---

**Cabbage**

Stonehead

Space 18" apart, rows 36" apart

Harvest 60-70 days from transplant

Early to mid season cabbage producing solid 3-1/2 pound heads. Nice blue-green color. Yellows resistant. "AAS Winner!"

---

**Cauliflower**

Snow Crown

Space 18" apart, rows 36" apart

Harvest 50-55 days from transplant

Produces 2-1/2 pound pure white heads. Cover heads as they mature to blanch them white. Tastes excellent fresh or frozen. "AAS Winner!"

---

**Cucumber**

Bush Pickle

Compact habit

Harvest 48 days from transplant

Vines produce 4-5" cylindrical fruits on bushy compact plants. Perfect for small gardens or patio planters.

---

**Cucumber**

Salad Bush

Space 24" apart

Harvest 42 days from transplant

Bush type burpless cucumber, producing 6-8" long fruit. An excellent choice in the vegetable garden.

---

**Cucumber**

Tasty Green

Space 10-12" apart

Harvest 62 days from transplant

Burpless variety producing 8-9" long dark green fruit. Best if grown on a trellis to achieve nice straight fruit.

---

**Eggplant**

Black Beauty

Space 18-30" apart, rows 30" apart

Harvest 80 days from transplant

Compact plant with firm, 8" oval, purple fruit. Average yield is 10-12 fruits per plant.

---

**Eggplant**

Japanese Millionaire

Space 30-36" apart, rows 30" apart

Harvest 65 days from transplant

Oriental type of eggplant that produces long, slender, deep purple fruit with creamy white flesh. Subtle flavor and thin skinned.

---

**Gooseberry**

Pixwell Gooseberry

Sun Space 3' apart

A small shrub producing pale-pink fruit. Very productive, self-pollinating, and bears the first year. Plants are nearly thorn-free and do well in average soils. Makes the best berry pies!

---

**Grape**

Canadice Seedless Grape

Sun Space 3' apart

Fully ripe red grapes are firm and have a pleasant tang, no tough skins. Flavor is excellent! This variety is hard to beat for fresh use. Produces 35-40 clusters of fruit per vine. Seedless.

---

---

**Grape**

Concord Seedless Grape

Sun Space 3' apart

Prolific vines producing large seedless grapes that are excellent for desserts, wine or juice. Train on a sturdy garden fence or trellis.

---

**Grape**

Edelweiss Grape

Sun Space 3' apart

A vigorous green-white grape with high sugar content and a good taste. This is a very disease resistant variety. A good dessert and wine grape.

---

**Grape**

St. Theresa Seedless Grape

Sun Space 3' apart

A top table grape, mostly seedless. St. Teresa produces an abundance of sweet, flavor-rich slip-skinned fruit in early September.

---

**Kale**

Dinosaur

Sun Space 24-36" apart

Harvest 30-60 days from transplant

An Italian heirloom. Blue-green leaves loaded with flavor. Harvest young in the spring but after the first frost as a fall crop.

---

**Kohlrabi**

Winner

Space 3" apart, rows 18-24" apart

Harvest 45 days from transplant

Very flavorful, reaches 4" diameter without becoming woody. Cross between turnip & cabbage.

---

**Leek**

American Flag

Space 4-6" apart, rows 18" apart

Harvest 70-100 days from transplant

Stalks have delicious mild onion flavor. Plant in trenches and mound soil up as they grow to promote blanching of the stalks. Very cold tolerant.

---

**Lettuce**

Butter crunch

Space 6-8" apart, rows 18" apart

Harvest 64-75 days from transplant

Butter head type of lettuce with thick flavorful, dark green leaves. Plants tend to be heat tolerant. Slower to bolt than most bibb lettuces. Virus resistant.

---

**Lettuce**

Great Lakes 659

Space 12" apart, rows 18" apart

Harvest 80-90 days from transplant

Excellent heading lettuce that produces large, firm, crisp, tender heads that are tasty in salads.

---

**Muskmelon**

Delicious

Space 36-48" apart

Harvest 78 days from transplant

Beautifully ribbed oval melon with deep-green skin and golden netting. Firm, salmon-toned flesh is aromatic and sweet.

---

**Okra**

Compact Green Fingers

Space 18" apart, rows 36" apart

Harvest 45-50 days from transplant

Produces dark green succulent 4" pods on compact, bushy plant. Attractive foliage w/pastel yellow flowers, ideal for container. Thrives and requires lots of Kansas heat.

---

**Okra**

Jambalaya

Space 18" apart, rows 36" apart

Harvest 50-55 days from transplant

Produces dark green succulent 4-5" pods on compact plant. Thrives and requires lots of Kansas heat.

---

**Onion**

Candy

Space dependant on use

Harvest 85 days from transplant

Day neutral variety. Huge, extremely early bulbs have golden brown skin and white interiors with a sweet, mild flavor.

---

**Pepper**

Anaheim Chili

Space 18-24" apart, rows 2-3' apart

Harvest 75-80 days from transplant

Tapered dark green to red pepper, bear throughout the season. Mildly hot.

---

**Pepper**

Baron

Space 18-24" apart, rows 2-3' apart

Harvest 72-75 days from transplant

Upright growing pepper producing thick walled, 4-lobed, 4" long fruit, sweet tasting, red/green fruits. Excellent for eating fresh, roasting & stuffing.

---

**Pepper**

California Wonder

Space 18-24" apart, rows 2-3' apart

Harvest 75 days from transplant

Upright growing pepper producing 4x4", 4-lobed blocky fruit. TVM resistant. Fruits remain green maturing to red.

---

**Pepper**

Garden Salsa

Space 18-24" apart, rows 2-3' apart

Harvest 73 day from transplant

Upright growing pepper plant producing 1x8-9", dark green fruit maturing to red. Moderately hot, ideal for salsa.

---

**Pepper**

Golden Bell

Space 18-24" apart, rows 2-3' apart

Harvest 65 days from transplant

Upright growing pepper with golden, blocky, thick walled, 3-1/2 x 4" fruit. Sweet green fruits mature to deep golden color.

---

**Pepper**

Habanero

Compact and bushy

Harvest 95 days from transplant

1-1/2 x 1" light green, orange. The hottest pepper in our greenhouse. Space 18-24" apart in rows 24-36" apart.

---

**Pepper**

Jalapeno  
Space 18-24" apart, rows 2-3' apart  
Harvest 60-65 days from transplant  
Upright growing pepper plant that produces 2-1/2 x 1" medium green fruit that matures to a bright red. Very HOT and PUNGENT!

---

**Pepper**

Long Red Cayenne-F1  
Space 18-24" apart, rows 2-3' apart  
Harvest 70 days from transplant  
Upright growing pepper producing 4-1/2 x 3/4" long, thin, green fruit. Fruit turns red at maturity. EXTREMELY HOT!

---

**Pepper**

Sweet Banana  
Space 18-24" apart, rows 2-3' apart  
Harvest 65-70 days from transplant  
Upright growing pepper producing 6x1-1/4", waxy, yellow fruit that taper to point. Sweet green fruits mature to deep golden color.

---

**Raspberry**

Bristol Black Raspberry  
Sun Space 3' apart  
Large black fruit with attractive glossy skin. Flesh is firm, excellent quality and good flavor. Good for canning or freezing.

---

**Raspberry**

Killarney Raspberry  
Sun Space 3' apart  
A summer-bearing red raspberry with great aroma and flavor. Excellent for freezing and canning. Sturdy growth habit. A distinct improvement over Latham.

---

**Rhubarb**

Crimson Cherry Rhubarb  
Sun Space 3-4' apart  
An excellent variety with long, thick, bright red stalks that are very tender and sweet.

---

**Spinach**

Seaside  
Sun Space 6" apart, rows 15" apart  
Harvest 25 days from transplant  
Slow-bolting, smooth-leaved variety for spring and summer. Seaside has upright, dark green leaves; stays small, which extends the baby leaf harvest window.

---

**Squash-Summer**

Gold Crookneck  
Space 2 per hill, 5-10' apart  
Harvest 50 days from transplant  
Bush-like vine producing heavy yields of slightly warty bright yellow fruit. Fine texture and flavor.

---

**Squash-Summer**

Zucchini Hybrid  
Space hills 3-6' apart  
Harvest 48-54 days from transplant  
Heavy producer of dark green, straight, 6-8" long fruit.

---

**Squash-Winter**

Butterbush  
Space 36" apart  
Harvest 85 days from transplant  
Produces 1-1/2 to 1-3/4 LB deep reddish-orange fruit. Has a very delicious, sweet, buttery flavor.

---

**Squash-Winter**

Table Ace F1  
Space 48" apart  
Harvest 70 days from transplant  
Produces 5-6" long, acorn type, dark green fruit with golden yellow flesh. Good winter squash with a nutty flavor.

---

**Strawberry**

Allstar Strawberry  
Sun Space 12-18" apart  
June Bearing  
As the name implies, the best of the best. It has excellent flavor, high yields, and large fruit size. It is an excellent variety for the home garden.

---

**Strawberry**

Eversweet Strawberry  
Sun Space 12-18" apart  
Everbearing  
Everbearing large red berries with exceptional flavor. Will fruit all summer long. Very heat tolerant. Great for patio planters.

---

**Strawberry**

Mignonette Strawberry  
Sun Space 12-18" apart  
Everbearing  
Delicious alpine strawberry that bears small deep red fruit. Vigorous compact growth makes it ideally suited for hanging baskets or patio containers.

---

**Strawberry**

Ozark Beauty Strawberry  
Sun Space 12-18" apart  
Everbearing  
Sets lots of large delicious berries with sugar-sweet taste and juicy texture. Withstands leaf spot and leaf scorch.

---

Vardaman  
Space 12" apart, rows 3-4' apart  
Harvest 90-100 days from transplant  
Produces delicious tasting, golden yellow tubers with deep orange flesh. Idea for small gardens. Yields are excellent. A USDA release. Ideal pH is 5.8-6.0, use dolomitic lime to raise pH if needed.

---

**Tomatilla**

Grande Rio Verde  
Sun Space 2-3' apart, rows 3-4' apart  
Harvest 70 days from transplant  
Need 2 plants to insure pollination, plant produces heavy yields of 3 oz green tomatillos for salsa verde. Tomatillos are fully ripe when it falls from plant.

---

**Tomato**

Beefmaster  
Sun Space 2-3' apart, rows 3-4' apart  
Harvest 70 days from transplant  
Indeterminate growing tomato producing extra large, round shaped fruit up to 12 oz or more in weight. VFN resistant.

---

**Tomato**

Better Boy  
Space 2-3' apart, rows 3-4' apart  
Harvest 70 days from transplant  
Indeterminate growing tomato producing large, 12-16 oz, globe shaped fruit. Produces heavy yields. VFN resistant.

---

**Tomato**

Big Boy  
Space 2-3' apart, rows 3-4' apart  
Harvest 78 days from transplant

A mid season, indeterminate growing tomato producing large, 12-16 oz, globe shaped fruit.

---

**Tomato**

Brandywine Red  
Space 18" apart, rows 36" apart  
Harvest 75-80 days from transplant

Heirloom. Flat, globe tomatoes have reddish-pink skin and tasty red flesh. Higher yielding in cooler weather. 10-16oz fruit size.

---

**Tomato**

Celebrity  
Space 2-3' apart, rows 3-4' apart  
Harvest 70 days from transplant

Determinate growing tomato with large, glossy, fruit with light green shoulders. VFR 1 & 2 NT resistant.

---

**Tomato**

Early Girl Improved  
Space 2-3' apart, rows 3-4' apart  
Harvest 52-54 days from transplant

Indeterminate growing tomato producing 4-6 oz. round fruit. Earliest slicing tomato. VF Race 1 & 2 resistant.

---

**Tomato**

German Johnson  
Space 2-3' apart, rows 3-4' apart  
Harvest 80 days from transplant

Indeterminate growing tomato producing extra large fruit up to 16 oz. or more in weight; sweet flavor. Heirloom variety worth a try if you have never grown them before.

---

**Tomato**

Jet Star  
Space 2-3' apart, rows 3-4' apart  
Harvest 72 days from transplant

Indeterminate growing tomato with medium globe shaped fruit. Resistant to VFR 1.

---

**Tomato**

Juliet  
Space 2-3' apart, rows 3-4' apart  
Harvest 60 days from transplant

Indeterminate growing tomato producing sweet, oblong shaped fruit that resist cracking and hold well on vine. Excellent for salads.

---

**Tomato**

La Roma  
Space 2-3' apart, rows 3-4' apart  
Harvest 76 days from transplant

Determinate growing tomato with large plum to pear shaped fruit. Good for salads, sauces and canning. Resistant to V F1 N and bacterial speck.

---

**Tomato**

Lemon Boy  
Space 2-3' apart, rows 3-4' apart  
Harvest 80 days from transplant

Indeterminate growing tomato producing excellent 8-9 oz, yellow fruit with low acid and mild flavor.

---

---

**Tomato**

Red Cherry  
Space 2-3' apart, rows 3-4' apart  
Harvest 75 days from transplant

Indeterminate growing tomato producing round 1-1/4" red fruit. A very heavy producer. Great for fresh garden salads and

---

**Tomato**

Red Grape  
Sun Space 2-3' apart, rows 3-4' apart  
Harvest 65 days from transplant

A consistent top choice in taste tests, w/ a higher sugar content than any other grape tomato. Indeterminate type

---

**Tomato**

Rutgers  
Space 2-3' apart, rows 3-4' apart  
Harvest 76-82 days from transplant

Indeterminate growing tomato with medium sized, flattened, globe-shaped fruits that are resistant to cracking. Resistant to V F race 1.

---

**Tomato**

Siam F1  
Sun

Cherry-type tomato that is more for sunny-indoor growing, works for patio as well. Short determinate variety, part of the mini kitchen selections.

---

**Tomato**

Sweet 100  
Space 2-3' apart, rows 3-4' apart  
Harvest 65 days from transplant

Indeterminate growing tomato producing clusters of smooth, red, 1 to 1-1/2" fruit. Combines the sweetest flavor with exceptional disease resistance.

---

**Tomato**

Sweet N Neat F1  
Space 2-3' apart, rows 3-4' apart  
Harvest 90 days from transplant

These tomato plants are small in size but big in taste. Each plant produces over 15 ripe fruit on an 8" plant, great for instant container gardening.

---

**Tomato**

Yellow Pear  
Space 2-3' apart, rows 3-4' apart  
Harvest 75 days from transplant

Indeterminate growing tomato that produces clear yellow pear shaped fruit that are low in acid. Individual fruits weigh less than 1 oz. each. A very productive plant.

---

**Watermelon**

Crimson Sweet  
Space hills 10' apart  
Harvest 97 days from transplant

Dependable producer with light green rinds marked with darker green stripes. Flesh is colorful, firm and fine grained, with small seeds and a high sugar content. Resists fusarium wilt.

---
