
Malus

Arkansas Black Spur Apple
Sun 15-25' tall 15-20' across

Large late season apple with dark red skin. High quality fruit even when summer nights are warm. For dessert and cooking. The fruit keeps for many months. Ripens in October.

Malus

Empire Apple
Sun 15-25' tall 15-20' across

Sweet and juicy, sprightly flavor, a cross of McIntosh and Red Delicious. Does well in hot summers. A heavy bearing tree. Ripens in late August to September.

Malus

Freedom Apple
Sun 15-25' tall 15-25' across

The red fruit is large and good for eating, sauces and juice. The flesh is crisp and juicy with a slight tart flavor. Immune to many apple diseases. Use any other apple for pollination.

Malus

Gala Apple
Sun 15-25' tall 15-25' across

A great early season apple with crisp firm fruit. Fine-grained texture and excellent flavor makes a sweet snack fresh or baked. Use any other apple for pollination.

Malus

Liberty Apple
Sun 15-25' tall 15-25' across

Medium to large sized fruit. Red, crisp and juicy with a sprightly flavor. Very productive. One of the most disease resistant apples developed to date. Use any other apple for pollination.

Prunus armeniaca

Harcot Apricot
Sun 15-20' tall 15-20' across

A late blooming Apricot with medium to large, sweet, juicy fruit, with rich flavor. Resistant to brown rot and perennial canker. Fruit ripens in early to mid-June. One of the best, self-fruitful

Prunus cerasus

Montmorency Cherry
Sun 12-18' tall 12-18' across

A very productive and hardy tree producing large, brilliant red fruit with yellow flesh. Excellent tart cherry for pies. Ripens after Northstar, usually mid to late July. Self-Pollinating.

Prunus cerasus

Northstar Cherry
Sun 8-10' tall 8-10' across

Vigorous, hardy tree producing red fruit with red flesh and a sweet-sour taste. Excellent for eating and canning. Ripens in June and July. Resistant to brown rot and cracking. Self-pollinating.

Prunus persica

Elberta Peach
Sun 10-12' tall 10-12' across

Very large, freestone fruit with deep golden yellow skin blushed over with red. A very high quality eating and canning peach. Resistant to brown rot. Self-Pollinating.

Prunus persica

Redhaven Peach
Sun 15-20' tall 15-20' across

One of the finest early peaches and one of the hardiest. The fruit has a beautiful red and golden yellow color, firm flesh, smooth texture, and fine flavor. Disease resistant. Self-pollinating.

Prunus persica

Spice Zee Nectarplum
Sun 15-25' tall 15-20' across

A cross between nectarine and plum. The fruit has white flesh and pale pink skin. Fully ripe fruit is flavorful with nectarine and plum trait detectable. Tree is quite ornamental. Self-fruitful.

Prunus salicina

Superior Plum
Sun 15-20' tall 12-15' across

A Japanese-American hybrid plum with large, firm, delicious fruit. Bears earlier and heavier than most plum trees. Ripens in late August to September. Self-fruitful.

Pyrus communis

Bartlett Pear
Sun 15' tall 15' across

A vigorous grower producing large fruit with buttery, juicy flavor. Tends to bear fruit for 50 to 75 years. Harvest mid-September. Allow to ripen indoors. Requires Cross-Pollination.

Pyrus communis

Bosc Pear
Sun 12-18' tall 10-15' across

A Pear that produces long narrow brown fruit that is superb fresh or cooked. One of the best, harvest in October. Needs cross pollination
