**Malus**

Arkansas Black Spur Apple

Sun 15-25' tall 15-20' across

Large late season apple with dark red skin. High quality fruit even when summer nights are warm. For dessert and cooking. The fruit keeps for many months. Ripens in October.

---

**Malus**

Empire Apple

Sun 15-25' tall 15-20' across

Sweet and juicy, sprightly flavor, a cross of McIntosh and Red Delicious. Does well in hot summers. A heavy bearing tree. Ripens in late August to September.

---

**Malus**

Freedom Apple

Sun 15-25' tall 15-25' across

The red fruit is large and good for eating, sauces and juice. The flesh is crisp and juicy with a slight tart flavor. Immune to many apple diseases. Use any other apple for pollination.

---

**Malus**

Gala Apple

Sun 15-25' tall 15-25' across

A great early season apple with crisp firm fruit. Fine-grained texture and excellent flavor makes a sweet snack fresh or baked. Use any other apple for pollination.

---

**Malus**

Liberty Apple

Sun 15-25' tall 15-25' across

Medium to large sized fruit. Red, crisp and juicy with a sprightly flavor. Very productive. One of the most disease resistant apples developed to date. Use any other apple for pollination.

---

**Prunus cerasus**

Montmorency Cherry

Sun 12-18' tall 12-18' across

A very productive and hardy tree producing large, brilliant red fruit with yellow flesh. Excellent tart cherry for pies. Ripens after Northstar, usually mid to late July. Self-Pollinating.

---

**Prunus cerasus**

Northstar Cherry

Sun 8-10' tall 8-10' across

Vigorous, hardy tree producing red fruit with red flesh and a sweet-sour taste. Excellent for eating and canning. Ripens in June and July. Resistant to brown rot and cracking. Self-pollinating.

---

**Prunus mandshurica**

Westcot Apricot

Sun 15-20' tall 15-20' across

Yellow fruit with an orange-red blush ripens in late July. Freestone fruit is juicy and is excellent for fresh eating or canning with a mild sweet flavor 2" diameter at maturity. Self fruitful

---

**Prunus persica**

Elberta Peach

Sun 10-12' tall 10-12' across

Very large, freestone fruit with deep golden yellow skin blushed over with red. A very high quality eating and canning peach. Resistant to brown rot. Self-Pollinating.

---

**Prunus persica**

Redhaven Peach

Sun 15-20' tall 15-20' across

One of the finest early peaches and one of the hardiest. The fruit has a beautiful red and golden yellow color, firm flesh, smooth texture, and fine flavor. Disease resistant. Self-pollinating.

---

**Prunus persica**

Spice Zee Nectarplum

Sun 15-25' tall 15-20' across

A cross between Nectarine and Plum. The fruit has white flesh and pale pink skin. Fully ripe fruit is flavorful with nectarine and plum trait detectable. Tree is quite ornamental. Self-fruitful.

---

**Prunus salicina**

Superior Plum

Sun 15-20' tall 12-15' across

A Japanese-American hybrid plum with large, firm, delicious fruit. Bears earlier and heavier than most plum trees. Ripens in late August to September. Self-fruitful.

---

**Pyrus communis**

Bartlett Pear

Sun 15' tall 15' across

A vigorous grower producing large fruit with buttery, juicy flavor. Tends to bear fruit for 50 to 75 years. Harvest mid-September. Allow to ripen indoors. Requires Cross-Pollination.

---

**Pyrus communis**

Comice Pear

Sun 20-25' tall 12-15' across

The gift pack pear. Sweet, fine texture, superb quality, one of the best. Short neck, greenish-yellow skin with a red blush. Late harvest.
