

---

**Blue Arrow Juncus**

Hardy Marginal  
Sun to Part Sun 36" tall M-4"  
Upright blue green foliage that adds interest to the edge of the pond. M - 4" deep

---

**Blue Rush**

Hardy Marginal  
Sun to Part Shade 1-2' tall M-2"  
Pinpoint blue-gray needles form a dense and uniform clump. Semi-evergreen. Takes some shade. Moist to 2" deep. Gets 24" wide

---

**Blue Variegated Iris**

Hardy Marginal  
Sun to Part Shade To 36" tall M-6"  
Excellent, easy to grow plant producing large clumps of sword-like leaves with blue blossoms in April and May.

---

**Caesars Brother Siberian Iris**

Hardy Marginal  
Sun to Part Shade M to 4"  
Blooms late Spring. Deep blue beardless flowers. Great for bogs or water gardens. Narrow upright foliage. Moist to 4" deep

---

**Cardinal Flower**

Hardy Marginal  
2-3' tall W  
Flowers Aug thru Oct. Tall spikes of intense red flowers rise out of a modest display of foliage. Striking summer color for a long period.

---

**Chameleon Houttuynia**

Hardy Marginal  
Sun to Part Shade 8-12" tall Moist  
Heart shaped foliage of yellow, green, bronze and red. Outstanding variation of colors. White flowers bloom in summer. Aggressive grower should be confined to containers.

---

**Common Cattail**

Hardy Marginal  
Part Sun to Part Shade 4-6' tall M-8"  
Tall, sword-shaped leaves and distinctive fruiting spikes. Attractive to bees, butterflies & birds. Grows in moist soil to 6" deep.

---

**Corkscrew Rush**

Hardy Marginal  
Part Sun to Part Shade 24" tall W-4"  
Clumps of cylindrical stems that spiral upwards to 24" tall. Natural looking bog habitat. Interesting in vase of cut flowers.

---

**Creeping Jenny**

Hardy Marginal  
Sun to Shade Trailing M-1"  
Foliage is round leaves on trailing stems. Excellent on waterfalls or tumble from edge of a tub garden. Moist to 1". Best in 1 gallon or larger pot.

---

**Equisetum or Horsetail**

Hardy Marginal  
Sun to Shade 24"+ tall M-1"  
Dark wiry, evergreen foliage. Thrives in moist soil to shallow water. Excellent for nestling between rocks at the ponds edge. Best kept in a pot. Stems often stay green in winter. Good cut stem.

---

**Flowering Pink Rush**

Hardy Marginal  
Sun to Part Sun  
Attractive pink flowers, leaves are thin, sword-shaped 3' green stalks topped with many small delicate pink flowers throughout summer. Flowers best in shallow moving water. Moist to 24"

---

**Flowering Rush Reed**

Hardy Marginal  
Sun to Part Shade 1-6' tall M-2"  
Light pink to rose colored flowers late summer in an umbrella shape. 1 to 4' or taller in deep water. Flowers best in shallow slowly moving water.

---

**Forget-Me-Nots**

Hardy Marginal  
Sun to Shade 8-10" tall M-1"  
Spring blooming plant producing dense clusters of small, bright blue flowers with yellow eyes. The green foliage grows above the water. Best if foliage kept above water even thru winter.

---

**Four Leaf Clover**

Hardy Marginal  
Sun to Shade Surface M-6"  
Excellent plant for beginners. Best selling, four leaf clustered clover with large dark green floating leaves. Will stand above water if pot is at surface. Fast growing good surface cover.

---

**Giant Corkscrew Rush**

Hardy Marginal  
Sun to Part Shade 18-24" tall M-4"  
Unusual dark green corkscrew stems. Creates a mound of unique foliage texture. Small light green flowers near top of stems in May, June. Moist to 4". Good filter plant

---

**Golden Rush Reed**

Hardy Marginal  
Sun to Part Shade 3-6' tall M-5"  
Bright green stripes on dark green leaves. Easy to grow. Moist soil to water 5" deep. Late summer plumes are gold rather than silver.

---

**Graceful Cattail**

Hardy Marginal  
Sun to Part Shade 4-6' tall M-6"  
Long, slender, grass-like leaves. Good for background. Small narrow brown catkin (flower). Flowers May, June. Popular. Grows in moist soil to 6" deep.

---

**Green Sweet Flag**

Hardy Marginal  
Sun to Part Sun 3 to 6' M-6"  
Upright spike, makes excellent background plant for the pond.

---

**Horsetail Rush**

Hardy Marginal  
Sun to Part Shade 3' tall M  
Jointed stems, very distinctive. Cylindrical habit when grown in a container. Evergreen. Tolerates some shade. Prefers very shallow water to moist soil. Good for cut vase arrangement.

---

**Houttuynia / Chameleon plant**

Hardy Marginal  
Sun to Part Shade 8-12" M-2"  
Broad, ovate, colorful leaves. Creeping habit. Prefers moist soil to shallow water. Can be invasive, best planted in 1 gal pots

---

**Iris Black Gamecock**

Hardy Marginal

Sun to Part Shade 2-3' tall M-8"

Striking midnight purple blossoms perch high atop graceful medium green foliage. Flowers are highly visible from a distance. Moist soil to water 8" deep.

---

**Lizard's Tail**

Hardy Marginal

Sun to Part Sun 1-3' M-6"

Flowers in July with delicate cream colored drooping blossoms. Unique seed formation, triangular green foliage. Submerge 1 to 6" in water. Easy to grow.

---

**Narrow Leaf Cattail**

Hardy Marginal

Part Sun to Part Shade 3-6' tall M-6"

Erect perennial grows 3 to 6' tall, long linear leaves 2-5' long, very narrow & flattened. Flowers mature in mid summer.

---

**Peaches & Cream Ribbon Grass**

Hardy Marginal

Sun to Part Shade 12-14" tall M-2"

Creamy white with thin green stripes. In spring & fall it is tinged in pink. Moist soil to water 2" deep. Excellent accent plant.

---

**Pickereel Rush**

Hardy Marginal

2'-3' tall W

Plant has shiny, heart-shaped foliage, producing long lavender spiked flowers. Flowers June thru September. Easy to grow

---

**Pink Forget-Me-Not**

Hardy Marginal

Part Sun to Shade 8-10" tall M-1"

Spring blooming plant producing dense clusters of small, bright PINK flowers. The green foliage grows above the water. Best if foliage kept above water even thru winter.

---

**Rain Lily**

Hardy Marginal

Sun to Part Shade 3-10" tall W

Grassy foliage with six petaled white flowers 1 to 3" across. Grow in moist soil to water 3" deep. Can overwinter indoors. Do not water until returning to pond.

---

**Spearwort**

Hardy Marginal

Sun to Part Shade 1-2' tall W-2"

Lightly branched with yellow buttercup like flowers. Long bloom time. Branches will weep over. Wet soil to 2" deep.

---

**Spike Rush**

Hardy Marginal

1' tall W

Attractive quill-shaped foliage makes this rush a favorite for the very edge of the pond.

---

**Sweet Flag**

Hardy Marginal

Sun to Shade 1-2' tall M-3"

Striking foliage provides interesting spike-like structure and wonderful color. Moist to 3". Good filter plant.

---

---

**Thalia dealbata**

Hardy Marginal

Sun to Part Sun 3-4' tall W -18"

Needs large pot. Large oval leaves on stout, tall stems. Unusual purple flowers high above leaves mid-summer, w/ purple seeds thru fall. Submerge 6 - 18" Do not cut off foliage in winter, submerge.

---

**Variegated Candy Stripe Reed**

Hardy Marginal

4' tall W

Green and white foliage with mild tints of soft pink.

---

**Variegated Cattail**

Hardy Marginal

Sun to Part Shade 4-6' tall M-6"

Long, slender, variegated grass-like leaves. Good for background. Small narrow brown catkin (flower). Flowers May, June. Popular. Grows in moist soil to 6" deep.

---

**Variegated Morrow's Sedge**

Hardy Marginal

Sun to Part Shade 1-2' tall M-2"

Dark green leaves with a yellow margin. Submerge up to 2". Makes a great edge of the pond plant.

---

**Variegated Society Garlic**

Hardy Marginal

Sun to Shade 8-18" tall W-2"

Smells strongly of garlic when bruised or cut. Umbel of lilac colored flowers that bloom in spring - summer. Cut & sink to 12" in winter

---

**Variegated Sweet Flag**

Hardy Marginal

Sun to Part Shade 24-36" M-6"

Perfect vertical accent plant for pond edge. Excellent background plant with season long green & white foliage.

---

**Water Celery**

Hardy Marginal

Sun to Shade 6-8" M-2"

Excellent for filtration, taking up nutrients that would otherwise contribute to green algae in ponds. Overwinters easily; will grow in house also. Good filter plant in mesh pot..

---

**Water Parsley**

Hardy Marginal

Sun to Shade 6-12" tall M-2"

Lush green foliage provides excellent contrast for other pond plants. Grows quickly as stems grow out across water surface. Good filter plant & good for streams & waterfalls.

---

**Water Willow**

Hardy Marginal

Sun to Part Sun M to 6"

Helps create a biological filter to keep water clean, also shades pond. Can grow up to 3 feet tall. Blooms intermittently from May to October.

---

**White Bulrush**

Hardy Marginal

Sun to Shade 4-5' tall M-6"

Tall white needle-like foliage is gently marked with narrow green vertical pinstripes. Plant sways & bends in breeze, providing excellent height, form & texture. Moist soil to water 6" deep.

---

---

**Yellow Iris**

Hardy Marginal

Sun to Part Shade To 36" tall M-6"

Excellent, easy to grow plant producing large clumps of sword-like leaves with bright yellow blossoms in April and May.

---

**Lotus**

Hardy Water Plant

Sun W-8"

Require large pot 20-24" and up. Should be fertilized regularly. Submerge 6 to 8" deep

---

**Water Hawthorne**

Hardy Water Plant

Sun to Part Shade 6" to 2' deep

Blooms in spring, dormant in summer, blooms again in the fall. Fragrant, sweet like vanilla, white, orchid-like flowers with maroon seeds. Fertilize monthly in summer. Sink in winter like water lily.

---

**Water Lily**

Hardy Water Plant

Sun Surface Bottom of pond

Fertilize monthly April to September & twice a month July & Aug. Divide or up-pot from April thru July, when rhizomes leaps pot or are too dense to fertilize.

---

**Water Hyacinth**

Tropical Floating

Part Sun to Sun Floating F

Floating plant with enlarged air sacs in the leaves. They help shade the pond, filter the water and remove pollutants such as heavy metals.

---

**Water Lettuce**

Tropical Floating

Part Shade to Shade Floating F

Pale green, shell-shaped leaves that form a flower shaped cluster. Great for covering and shading the surface of the water.

---

**Baby Tut**

Tropical Marginal

Sun to Shade 34-36" W

Compact tight tufts of green strands atop its many stems. Adds drama to pond. Keep soil moist but do not submerge crown of plant.

---

**Black Magic Taro**

Tropical Marginal

Sun to Shade 2-4' tall M-6"

Gorgeous dark burgundy leaves. Lends a dramatic contrast to the pond. Submerge to 6" deep

---

**Blue Bell 'Chi Chi'**

Tropical Marginal

Sun to Part Shade 2' tall W

Blooms Spring - Summer. Small, pink bell-shaped flowers. Short, green linear foliage.

---

**Bluebell**

Tropical Marginal

Sun to Part Shade 2-4' tall W

Small lavender-blue bell flowers constantly cover this species. Short, green linear foliage. Grows in moist soil or water to 6" deep.

---

---

**Butterfly Snowflake**

Tropical Marginal

Sun to Part Shade Surface 3-6"

Flowers May thru Sept. White snowflake-shaped flowers are produced continually all summer above butterfly shaped lily-like black & green leaves. Adds texture to pond & hide pots of other plants.

---

**Canna**

Tropical Marginal

Sun to Shade 2-9' tall W

Full sun provides best color. Grown for bright foliage and colorful flowers. Moist soil to shallow water depth.

---

**Copperleaf**

Tropical Marginal

Sun to Part Shade Surface W

Narrow copper-maroon leaves and white flowers Great color contrast for ponds.

---

**Dwarf Papyrus**

Tropical Marginal

Sun to Shade 18-24" W-4"

Likes moving water, good accent plant, deer resistnt, upright, grassy.

---

**Dwarf Red-stem Parrot Feather**

Tropical Marginal

Sun to Part Shade 6" M-8"

Soft textured trailing stems will spread from this plant. Good oxygenator, creates fish spawning habitat in ponds. Max. depth 8". Great for container gardens or small ponds..

---

**Dwarf Water Bamboo**

Tropical Marginal

Sun to Shade 12-14" M-2"

Grow 12-14" in full sun taking on yellow cast; in shade grows 36" tall & stays deep green. Has small brown tassels along top third of stem. Lends Oriental flair to pond. Keep in moist soil to 2" deep.

---

**Fiber Optic Grass**

Tropical Marginal

Sun to Part Shade 6-12" M-1"

This plant gets its name from the small bronzish flowers on the tip of each stem. Grows in moist soil to 1" of water. Good filter plant in pea gravel.

---

**Floating Heart**

Tropical Marginal

Sun to Part Shade Surface W

Grown for round leaves and star-shaped flowers that sit on the surface. Moist soil to 24" of water. Can be aggressive, plant in 1 gal container

---

**Impatiens**

Tropical Marginal

Shade to Sun 12" tall M

Great for shallow areas and shallow moving water. Keep moist, but do not submerge crown of plant.

---

**King Tut**

Tropical Marginal

Sun to Part Shade 48-72" W

Thriller for the pond, adds height & drama. Keep soil moist but do not cover crown of plant with water.

---

---

**Lemon Bacopa**

Tropical Marginal

Sun to Shade Surface to 2" M-2"

Covers surface with trailing foliage and flowers. Blooms most of summer. Intense lemon scented foliage. Good filter plant

---

**Miniature 4 Leaf Clover**

Tropical Marginal

Sun to Part Shade Surface W

The lucky charms of the pond. Easy to grow; grown for attractive foilage.

---

**Mosaic Plant**

Tropical Marginal

Sun to Part Shade Surface M-12"

Submerge 3-12". Forms a mosaic-like circle. Floating leaves are green with red edges. Quickly provides water coverage. Has small single yellow flowers. Does not like alkaline water.

---

**Orange Snowflake**

Tropical Marginal

Sun to Part Shade Surface W

Flowers May thru Sept. Orange snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Submerge 4 to 14".

---

**Parrot's Feather**

Tropical Marginal

Sun to Part Shade 6" M-24"

Soft textured trailing stems spread from plant. Good oxygenator & fish spawning habitat in ponds. Max. depth 24" Great for container gardens. Helps soften edges of pond. Anchor with rock or sand

---

**Sensitive Large Leaf Plant**

Tropical Marginal

Part Sun to Part Shade 2" tall

Leaves are sensative and close when touched. Quick grower with stems trailing out on the water surface.

---

**Short Red Rice**

Tropical Marginal

Sun to Part Shade 12-14" W

Red foliage makes this plant truly unique for the pond. Submerge 4 - 12". Makes rice at the end of season. Oryza sativa 'Red Dragon'

---

**Star Grass**

Tropical Marginal

Sun to Part Shade 1-2' tall W

Flowers June thru Sept. Narrow leaves atop needle-like stems unfold to reveal white star-shaped flowers that persist throughout the summer.

---

**Taro Imperial**

Tropical Marginal

Sun to Part Shade 2-4' tall W

Gorgeous dark burgundy leaves with green accents. Lends a dramatic contrast to the pond. Submerge to 4" deep

---

**Toothache plant**

Tropical Marginal

Sun to Part Sun M

Flowering herb, attracts fireflies when blooming, small, erect, grows quickly and bears gold & red inflorescences buds called buzz buttons. Grows in moist water.

---

**Umbrella Palm**

Tropical Marginal

Sun to Part Shade 18-36" tall M-3"

Stunning in containers or at pond's edge. Whorls of green foliage on tall stalks. Water depth max. 4". Sun & wind can brown the bracts. Great filter plant in pea gravel.

---

**Water Poppy**

Tropical Marginal

Sun to Shade Surface W

Rounded leaves & creamy yellow flowers. Easy to grow, continuous blooming. Tolerates a lot of shade. Submerge 4-12"

---

**Water Snowball**

Tropical Marginal

Sun to Shade To 36" tall W

Bushy plant with clusters of white flowers. Floats on water and grows to 3 feet high & wide. Submerge 1 to 12" deep

---

**White Fringe Snowflake**

Tropical Marginal

Sun to Part Shade Surface 3-6"

Flowers May thru Sept. White snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Adds texture to pond & hide pots of other plants.

---

**Yellow Snowflake**

Tropical Marginal

Sun to Part Shade Surface 3-6"

Flowers May thru Sept. Yellow snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Adds texture to pond & hide pots of other plants.
