

---

**Hardy Marginal**

Arrow Arum  
Sun 36" tall M-6"

Vigorous bog plant. Tall stems bear narrow arrow-shaped leaves with distinct veins. Green spathes have wavy yellow-white edge followed by green berries.

---

**Hardy Marginal**

Arrowhead  
Sun 18-36" M-6"

Large tubers produce pointed arrowshaped green leaves. Triangular flower stems hold delightfully whorled white petalled flowers. Attractive planted in groups at water's edge.

---

**Hardy Marginal**

Blue Pickerel  
Sun to Part Sun 24-36" tall M-12"

Attractive, hardy bog rush has heavily variegated foliage. The tall quill-like stems are banded with a creamy white color. A dwarf form; this cultivar is ideal for shallow water.

---

**Hardy Marginal**

Blue Pickerel Rush  
Sun to Part Sun To 36" tall M-12"

Clumping bog plant has continuous spikes of deep blue-purple flowers. Blooms late spring to fall. Excellent for massing, thrives in shallow waters.

---

**Hardy Marginal**

Blue Variegated Iris  
Sun To 36" tall M-6"

Excellent, easy to grow plant producing large clumps of sword-like leaves with blue blossoms in April and May.

---

**Hardy Marginal**

Caesars Brother Siberian Iris  
Sun to Part Sun To 36" tall M

Deep purple beardless flowers. Blooms late spring. Great for edge of pond and moist areas. Tall foliage remains beautiful until frost.

---

**Hardy Marginal**

Cardinal Flower  
2-3' tall W  
Flowers Aug thru Oct. Tall spikes of intense red flowers rise out of a modest display of foliage. Striking summer color for a long period.

---

**Hardy Marginal**

Cattail  
Sun to Part Shade 4-6' tall M - 24"

Long, slender, grass-like leaves. Good for background. Small narrow brown catkin (flower). Flowers May, June. Popular. Grows in moist soil to 24" deep.

---

**Hardy Marginal**

Chameleon Houttuynia  
Sun to Part Shade 8-12" tall Moist  
Heart shaped foliage of yellow, green, bronze and red. Outstanding variation of colors. White flowers bloom in summer. Aggressive grower should be confined to containers.

---

**Hardy Marginal**

Common Cattail  
Part Sun to Part Shade 4-6' tall M-8"  
Tall, sword-shaped leaves and distinctive fruiting spikes. Attractive to bees, butterflies & birds. Grows in moist soil to 6" deep.

---

**Hardy Marginal**

Corkscrew Rush  
Part Sun to Part Shade 24" tall W-4"

Clumps of cylindrical stems that spiral upwards to 24" tall. Natural looking bog habitat. Interesting in vase of cut flowers.

---

**Hardy Marginal**

Creeping Jenny  
Sun to Shade Trailing M-1"

Foliage is round leaves on trailing stems. Excellent on waterfalls or tumble from edge of a tub garden. Moist to 1". Best in 1 gallon or larger pot.

---

**Hardy Marginal**

Dwarf Four Leaf Clover  
Sun 4-6" tall W 0-6"

A dwarf four-leaf clover for the edges of your pond that propagates via runners. Bright green upright foliage only grows 4-6" tall. To WINTER OVER submerge 1 foot below surface

---

**Hardy Marginal**

Equisetum or Horsetail  
Sun to Shade 24"+ tall M-1"

Dark wiry, evergreen foliage. Thrives in moist soil to shallow water. Excellent for nestling between rocks at the ponds edge. Best kept in a pot. Stems often stay green in winter. Good cut stem.

---

**Hardy Marginal**

Flowering Rush Reed  
Sun to Part Shade 1-6' tall M-2'

Light pink to rose colored flowers late summer in an umbrella shape. 1 to 4' or taller in deep water. Flowers best in shallow slowly moving water.

---

**Hardy Marginal**

Forget-Me-Nots  
Sun to Shade 8-10" tall M-1"

Spring blooming plant producing dense clusters of small, bright blue flowers with yellow eyes. The green foliage grows above the water. Best if foliage kept above water even thru winter.

---

**Hardy Marginal**

Four Leaf Clover  
Sun to Shade Surface M-6"

Excellent plant for beginners. 4 leaf clustered clover w/large dark green floating leaves. Will stand above water if pot is at surface. Fast growing good surface cover. For WINTER submerge pot 1' deep

---

**Hardy Marginal**

Giant Corkscrew Rush  
Sun to Part Shade 18-24" tall M-4"

Unusual dark green corkscrew stems. Creates a mound of unique foliage texture. Small light green flowers near top of stems in May, June. Moist to 4". Good filter plant

---

**Hardy Marginal**

Graceful Cattail  
Sun to Part Shade 18-24" M-6"

Long, slender, grass-like leaves. Good for background. Small narrow brown catkin (flower). Flowers May, June. Popular. Grows in moist soil to 6" deep.

---

**Hardy Marginal**

Green Sweet Flag  
Sun to Part Sun 3 to 6' M-6"  
Upright spike, makes excellent background plant for the pond.

---

**Hardy Marginal**

Horsetail Rush

Sun to Part Shade 3' tall M

Jointed stems, very distinctive. Cylindrical habit when grown in a container. Evergreen. Tolerates some shade. Prefers very shallow water to moist soil. Good for cut vase arrangement.

---

**Hardy Marginal**

Houttuynia / Chameleon plant

Sun to Part Shade 8-12" M-2"

Broad, ovate, colorful leaves. Creeping habit. Prefers moist soil to shallow water. Can be invasive, best planted in 1 gal pots

---

**Hardy Marginal**

Iris Black Gamecock

Sun to Part Shade 2-3' tall M-8"

Striking midnight purple blossoms perch high atop graceful medium green foliage. Flowers are highly visible from a distance. Moist soil to water 8" deep.

---

**Hardy Marginal**

Lizard's Tail

Sun to Part Sun 1-3' M-6"

Flowers in July with delicate cream colored drooping blossoms. Unique seed formation, triangular green foliage. Submerge 1 to 6" in water. Easy to grow.

---

**Hardy Marginal**

Miniature 4 Leaf Clover

Sun to Part Shade Surface W

The lucky charms of the pond. Easy to grow; grown for attractive foilage. To WINTER OVER submerge 1 foot below surface.

---

**Hardy Marginal**

Narrow Leaf Cattail

Part Sun to Part Shade 3-6' tall M-6"

Erect perennial grows 3 to 6' tall, long linear leaves 2-5' long, very narrow & flattened. Flowers mature in mid summer.

---

**Hardy Marginal**

Peaches & Cream Ribbon Grass

Sun to Part Shade 12-14" tall M-2"

Creamy white with thin green stripes. In spring & fall it is tinged in pink. Moist soil to water 2" deep. Excellent accent plant.

---

**Hardy Marginal**

Pickerel Rush

2'-3' tall W

Plant has shiny, heart-shaped foliage, producing long lavender spiked flowers. Flowers June thru September. Easy to grow

---

**Hardy Marginal**

Pink Forget-Me-Not

Part Sun to Shade 8-10" tall M-1"

Spring blooming plant producing dense clusters of small, bright PINK flowers. The green foliage grows above the water. Best if foliage kept above water even thru winter.

---

**Hardy Marginal**

Rain Lily

Sun to Part Shade 3-10" tall W

Grassy foliage with six petaled white flowers 1 to 3" across. Grow in moist soil to water 3" deep. Can overwinter indoors. Do not water until returning to pond.

---

**Hardy Marginal**

Spearwort

Sun to Part Shade 1-2' tall W-2"

Lightly branched with yellow buttercup like flowers. Long bloom time. Branches will weep over. Wet soil to 2" deep.

---

**Hardy Marginal**

Spike Rush

1' tall W

Attractive quill-shaped foliage makes this rush a favorite for the very edge of the pond.

---

**Hardy Marginal**

Sweet Flag

Sun to Shade 1-2' tall M-3"

Striking foliage provides interesting spike-like structure and wonderful color. Moist to 3". Good filter plant.

---

**Hardy Marginal**

Thalia dealbata

Sun to Part Sun 3-4' tall W -18"

Needs large pot. Large oval leaves on stout, tall stems. Unusual purple flowers high above leaves mid-summer, w/ purple seeds thru fall. Submerge 6 - 18" Do not cut off foliage in winter, submerge.

---

**Hardy Marginal**

Variegated 4 Leaf Clover

Sun to Shade Surface W-6"

Charming bog plant forms a variegated green & white curtain of 4 leaf clovers ideal for shading fish. Easy to grow. 4-8" tall To WINTER OVER submerge 1 foot below surface.

---

**Hardy Marginal**

Variegated Candy Stripe Reed

4' tall W

Green and white foliage with mild tints of soft pink.

---

**Hardy Marginal**

Variegated Cattail

Sun to Part Shade 4-6' tall M-6"

Long, slender, variegated grass-like leaves. Good for background. Small narrow brown catkin (flower). Flowers May, June. Popular. Grows in moist soil to 6" deep.

---

**Hardy Marginal**

Variegated Morrow's Sedge

Sun to Part Shade 1-2' tall M-2"

Dark green leaves with a yellow margin. Submerge up to 2". Makes a great edge of the pond plant.

---

**Hardy Marginal**

Variegated Society Garlic

Sun to Shade 8-18" tall W-2"

Smells strongly of garlic when bruised or cut. Umbel of lilac colored flowers that bloom in spring - summer. Cut & sink to 12" in winter

---

**Hardy Marginal**

Variegated Sweet Flag

Sun to Part Shade 24-36" M-6"

Perfect vertical accent plant for pond edge. Excellent background plant with season long green & white foliage.

---

**Hardy Marginal**

Water Celery

Sun to Shade 6-8" M-2"

Excellent for filtration, taking up nutrients that would otherwise contribute to green algae in ponds. Overwinters easily; will grow in house also. Good filter plant in mesh pot..

---

**Hardy Marginal**

Water Parsley  
Sun to Shade 6-12" tall M-2"

Lush green foliage provides excellent contrast for other pond plants. Grows quickly as stems grow out across water surface. Good filter plant & good for streams & waterfalls.

---

**Hardy Marginal**

Water Willow  
Sun to Part Sun M to 6"

Helps create a biological filter to keep water clean, also shades pond. Can grow up to 3 feet tall. Blooms intermittently from May to October.

---

**Hardy Marginal**

White Bulrush  
Sun to Shade 4-5' tall M-6"

Tall white needle-like foliage is gently marked with narrow green vertical pinstripes. Plant sways & bends in breeze, providing excellent height, form & texture. Moist soil to water 6" deep.

---

**Hardy Marginal**

Zebra Rush  
Sun to Part Sun 24-36" M-12"

This attractive, hardy bog rush has heavily variegated foliage. The tall quill-like stems are banded with creamy white color. Dwarf form; ideal for shallow water.

---

**Hardy Water Plant**

Lotus  
Sun W-8"

Require large pot 20-24" and up. Should be fertilized regularly. Submerge 6 to 8" deep

---

**Hardy Water Plant**

Water Hawthorne  
Sun to Part Shade 6" to 2' deep

Blooms in spring, dormant in summer, blooms again in the fall. Fragrant, sweet like vanilla, white, orchid-like flowers with maroon seeds. Fertilize monthly in summer. Sink in winter like water lily.

---

**Hardy Water Plant**

Water Lily  
Sun Surface Bottom of pond

Fertilize monthly April to September & twice a month July & Aug. Divide or up-pot from April thru July, when rhizomes leaps pot or are too dense to fertilize.

---

**Tropical Floating**

Water Hyacinth  
Part Sun to Sun Floating F

Floating plant with enlarged air sacs in the leaves. They help shade the pond, filter the water and remove pollutants such as heavy metals.

---

**Tropical Floating**

Water Lettuce  
Part Shade to Shade Floating F

Pale green, shell-shaped leaves that form a flower shaped cluster. Great for covering and shading the surface of the water.

---

**Tropical Marginal**

Baby Tut  
Sun to Shade 34-36" W

Compact tight tufts of green strands atop its many stems. Adds drama to pond. Keep soil moist but do not submerge crown of plant.

---

**Tropical Marginal**

Black Magic Taro  
Sun to Shade 2-4' tall M-6"

Gorgeous dark burgundy leaves. Lends a dramatic contrast to the pond. Submerge to 6" deep

---

**Tropical Marginal**

Bloody Dock  
Part Sun to Shade 8-14" M-1"  
Decorative green foliage with red veins.

---

**Tropical Marginal**

Blue Bell 'Chi Chi'  
Sun to Part Shade 2' tall W  
Blooms Spring - Summer. Small, pink bell-shaped flowers. Short, green linear foliage.

---

**Tropical Marginal**

Bluebell  
Sun to Part Shade 2-4' tall W  
Small lavender-blue bell flowers consistently cover this species. Short, green linear foliage. Grows in moist soil or water to 6" deep.

---

**Tropical Marginal**

Butterfly Snowflake  
Sun to Part Shade Surface 3-6"

Flowers May thru Sept. White snowflake-shaped flowers are produced continually all summer above butterfly shaped lily-like black & green leaves. Adds texture to pond & hide pots of other plants.

---

**Tropical Marginal**

Canna  
Sun to Shade 2-9' tall W  
Full sun provides best color. Grown for bright foliage and colorful flowers. Moist soil to shallow water depth.

---

**Tropical Marginal**

Copperleaf  
Sun to Part Shade Surface W  
Narrow copper-maroon leaves and white flowers Great color contrast for ponds.

---

**Tropical Marginal**

Dwarf Papyrus  
Sun to Part Sun 30" W-6"  
Graceful tropical bog plant makes a good accent plant with unique tufted umbrella-like foliage.

---

**Tropical Marginal**

Dwarf Red-stem Parrot Feather  
Sun to Part Shade 6" M-8"  
Soft textured trailing stems will spread from this plant. Good oxygenator, creates fish spawning habitat in ponds. Max. depth 8". Great for container gardens or small ponds..

---

**Tropical Marginal**

Dwarf Water Bamboo  
Sun to Shade 12-14" M-2"  
Grow 12-14" in full sun taking on yellow cast; in shade grows 36" tall & stays deep green. Has small brown tassels along top third of stem. Lends Oriental flair to pond. Keep in moist soil to 2" deep.

---

**Tropical Marginal**

Fiber Optic Grass  
Sun to Part Shade 6-12" M-1"

This plant gets its name from the small bronzish flowers on the tip of each stem. Grows in moist soil to 1" of water. Good filter plant in pea gravel.

---

**Tropical Marginal**

Floating Heart  
Sun to Part Shade Surface W

Grown for round leaves and star-shaped flowers that sit on the surface. Moist soil to 24" of water. Can be aggressive, plant in 1 gal container

---

**Tropical Marginal**

Golden Rush Reed  
Sun to Part Shade 18-24" M-6"

Has distinct gold stripe that runs vertically along the stem. Grows well at water's edge or in bog garden.

---

**Tropical Marginal**

Impatiens  
Shade to Sun 12" tall M

Great for shallow areas and shallow moving water. Keep moist, but do not submerge crown of plant.

---

**Tropical Marginal**

King Tut  
Sun to Part Shade 48-72" W

Thriller for the pond, adds height & drama. Keep soil moist but do not cover crown of plant with water.

---

**Tropical Marginal**

Lemon Bacopa  
Sun to Shade Surface to 2" M-2"

Covers surface with trailing foliage and flowers. Blooms most of summer. Intense lemon scented foliage. Good filter plant

---

**Tropical Marginal**

Mosaic Plant  
Sun to Part Shade Surface M-12"

Submerge 3-12". Forms a mosaic-like circle. Floating leaves are green with red edges. Quickly provides water coverage. Has small single yellow flowers. Does not like alkaline water.

---

**Tropical Marginal**

Orange Snowflake  
Sun to Part Shade Surface W

Flowers May thru Sept. Orange snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Submerge 4 to 14".

---

**Tropical Marginal**

Parrot's Feather  
Sun to Part Shade 6" M-24"

Soft textured trailing stems spread from plant. Good oxygenator & fish spawning habitat in ponds. Max. depth 24" Great for container gardens. Helps soften edges of pond. Anchor with rock or sand

---

**Tropical Marginal**

Sensitive Large Leaf Plant  
Part Sun to Part Shade 2" tall

Leaves are sensitive and close when touched. Quick grower with stems trailing out on the water surface.

---

**Tropical Marginal**

Short Red Rice  
Sun to Part Shade 12-14" W

Red foliage makes this plant truly unique for the pond. Submerge 4 - 12". Makes rice at the end of season. *Oryza sativa* 'Red Dragon'

---

**Tropical Marginal**

Star Grass  
Sun to Part Shade 1-2' tall W

Flowers June thru Sept. Narrow leaves atop needle-like stems unfold to reveal white star-shaped flowers that persist throughout the summer.

---

**Tropical Marginal**

Taro Imperial  
Sun to Part Shade 2-4' tall W

Gorgeous dark burgundy leaves with green accents. Lends a dramatic contrast to the pond. Submerge to 4" deep

---

**Tropical Marginal**

Toothache plant  
Sun to Part Sun M

Flowering herb, attracts fireflies when blooming, small, erect, grows quickly and bears gold & red inflorescences buds called buzz buttons. Grows in moist water.

---

**Tropical Marginal**

Umbrella Palm  
Sun to Part Shade 18-36" tall M-3"

Stunning in containers or at pond's edge. Whorls of green foliage on tall stalks. Water depth max. 4". Sun & wind can brown the bracts. Great filter plant in pea gravel.

---

**Tropical Marginal**

Variegated Striped Rush  
Sun to Part Shade 18-24" tall W 0-6"

Grows well at water's edge or in bog gardens.

---

**Tropical Marginal**

Water Poppy  
Sun to Shade Surface W

Rounded leaves & creamy yellow flowers. Easy to grow, continuous blooming. Tolerates a lot of shade. Submerge 4-12"

---

**Tropical Marginal**

Water Snowball  
Sun to Shade To 36" tall W

Bushy plant with clusters of white flowers. Floats on water and grows to 3 feet high & wide. Submerge 1 to 12" deep

---

**Tropical Marginal**

White Fringe Snowflake  
Sun to Part Shade 8-12" M-1"

Flowers May thru Sept. White snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Adds texture to pond & hide pots of other plants.

---

**Tropical Marginal**

Yellow Snowflake  
Sun to Part Shade Surface 3-6"

Flowers May thru Sept. Yellow snowflake-shaped flowers are produced continually all summer above smooth, round lily-like leaves. Adds texture to pond & hide pots of other plants.
